### Editor's Note:

My oldest daughter, Ariel, came to visit this past week. The kids were thrilled to see her. She attended some of the school events the kids had and they gave her, her Mother's Day presents.

I gave my mother the fern I have been carefully tending, yes it's still alive, for Mother's Day as well as a wind spinner. Zach is insisted on taking me out to eat, but I told him to save his money and just make me something.

Father's day is just around the corner. Don't forget dad. There is still time to order something for delivery before the big day.

I'm just waiting for the weather to turn warm again. This cold snap has really gotten to my joints.

**DAVID STOLTZFUS FUND**

On Sunday morning, April 19, David Stoltzfus lost his wife and six children (the whole family). David had just arrived at church a 1/2 mile from his home (wife Sarah stayed home because one of the boys was sick) when suddenly the beautiful Sunday morning was shattered by a loud explosion. Within seconds the whole house was engulfed in flames; the house and everything in it was lost.

**If you want better nutrition.... you need to start with better soil**

Biochar blends available for various farming needs, call for more information.

**WHAT IS BIOCHAR?**

Our Biochar is steam activated carbon that is beneficial for our soils and animals

- Biochar creates a biology in your soil that saves money on fertilizer inputs.
- Biochar has the unique ability for attracting and holding moisture, nutrients, and agrochemicals, even retaining difficult to hold nutrients like nitrogen and phosphorus. Nitrogen and phosphorus tend to run off regular soils, upsetting the ecosystem balance in streams and water ways.
- Biochar creates better bedding for chicken houses, dairy cows, sheep, and horses.
- Mix it to your feed for better animal health, and a good manure.

**WHAT IS THE BENEFIT TO YOU?**

- Saves costs over high fertilizer year after year.
- Creates a healthier environment for you and your family.
- No dangerous side effects to humans, animals, or ecosystems.
- Puts more dollars in your pocket.

## Farewell Song

by Lenore Hetrick

Farewell, O books! Our parting pleasure  
Now we gladly tell.  
The last you'll see of them and me!  
Old schoolhouse, it's farewell.  
We thank the friends who heard us sing,  
We thank the old school bell.  
To them, to you, to everyone  
We loudly sing, "Farewell!"

We're coming, woods! We're coming, hills!  
We're surely on our way.  
In poems we have so little space  
A proper word to say.  
A word that would express our joy  
This lovely month of May.  
We're coming, trees! We're coming, brooks!  
Graduation is here! HURRAY!

FARM ANIMALS

# Hope in the form of chicks

Tsira was only 30 years old when her husband passed away unexpectedly. She lives in the country of Georgia which is located in southeastern Europe. Life was difficult for Tsira and her two young children. “We were left without means of support. I raised my children in great poverty,” Tsira reminisced.

Time went on and Tsira’s children got married and started their own families. Life was a little easier for Tsira, now that she had only herself to support. But recently, Tsira suffered yet another loss when her son passed away suddenly. “The loss of my son was a double blow for me. Now I live with my daughter-in-law and we are raising three fatherless children. We live in great need,” Tsira told our contacts.

“Many nights I woke up thinking about what I would feed the children in the morning,” she shared. “With tears I prayed to God for help because it was painful to see my hungry grandchildren. We were going through very difficult times.”

Once again Tsira’s life changed, this time by the gift of chicks. “God’s people brought us chicks,” she rejoiced. “What surprised us even more was that

Tsira and her three grandchildren are excited to receive chicks from CAM.

along with the chicks they also brought good quality feed!” How glad Tsira and her family were for these chicks!

“Words cannot describe the joy of seeing my grandchildren smile again,” Tsira told our contacts. “Your help showed us there are still kind and caring people in the world. Now we look to the future with hope and believe that together many things can change.”

## “Lions Mane Talk”

At Mushroom Maiden Farm, we believe in the same enduring principles that guide our communities: faith, family, stewardship of the land, and honest work done well. In a world that often rushes toward shortcuts, we choose a simpler, more transparent path, growing and crafting our products with care, patience, and integrity.

Our mushrooms are cultivated high in the Appalachian Mountains, where clean air, pure water, and rich forest traditions shape their strength. Every batch is tested by an independent lab to ensure purity and quality. We use 100% fruiting bodies, the part of the mushroom where the most valuable nutrients are found, so you receive only the best of what nature provides.

Our Lion’s Mane mushroom capsules are carefully prepared to support clarity and well-being, made without fillers or unnecessary additives. Alongside them, we offer two wholesome varieties of coffee, a smooth and robust dark Arabica bean, roasted for rich flavor and steady comfort and a dark Arabica bean Cinnamon Breakfast Roll coffee. To season your table, choose from four distinct mushroom enhanced salts. We offer a Wild Hickory Cold-Smoked Salt, Himalayan Pink, Sriracha, and Thai Ginger, each crafted to complement honest, home-cooked meals.

As a 100% woman-owned farm, we value humility, hard work, and transparency in every step, from growing to packaging. We are committed to straightforward practices and products you can trust for your home and family.

Simple ingredients. Careful hands. Honest quality. That is the Mushroom Maiden promise.

## “I Didn’t Understand It At First Either...”

### A simple story about energy, and what I learned the hard way

Dear friend,

I want to tell you something honestly.

There was a time when I didn’t fully understand this either. People would come in, sit across from me, and say things like:

“I’m just tired all the time.”

“I don’t bounce back like I used to.”

“I’ve had everything checked... and they say I’m fine.”

And for a while, I didn’t have a clear answer for them. Their labs looked “normal.” Nothing obvious stood out. Yet you could see it in their face... something wasn’t right.

Then I started noticing a pattern. Over time, I began looking closer. Not just at the numbers themselves... but how the whole picture fits together. And I kept seeing the same thing. People who felt worn down... people who had lost strength... people who just didn’t feel like themselves anymore...

Often had one thing in common. Their bodies weren’t producing energy the way they should.

It brought me back to something simple. Inside each of us are tiny parts called mitochondria.

They take in oxygen and nutrients... and turn them into usable energy. Simple as that. You can think of it like working a full day in the field. If your tools are sharp and your strength is there, the work gets done. If something is off, even a little... Everything feels heavier. That’s what happens inside the body.

Why this matters more than most realize. The body is not careless. It doesn’t just break down for no reason. When it senses strain over time... it begins to slow things down to protect itself.

Energy production is one of the first things it reduces. Not because it’s failing... But

because it’s trying to keep going the best way it can.

The photograph shown here shows that hard work requires energy.

I remember one case clearly. A man came in, a hardworking, steady type.

He told me, “I can still get through the day... but it takes everything I’ve got.” He had already been told his labs were fine.

But when we walked through them carefully, piece by piece... a different story started to show. Not a disease, Not anything dramatic. Just a body under strain... not producing energy the way it once did. Once he understood that, things finally started to make sense for him. And that’s what I’ve seen again and again since.

The part most people miss: Standard lab work is still useful. Very useful. But it’s often read in a narrow way... just looking for something clearly “wrong.” What I’ve learned is this: Even when values fall inside the normal range, they can still show patterns of stress, imbalance, or inefficiency. That’s where careful review matters.

What this means for you.

If you’ve been feeling: More tired than you used to. Slower to recover. Not as clear in your thinking Or just not quite yourself, and you’ve been told everything looks fine... It may be worth taking a closer, more thoughtful look.

Here’s what some of my clients have to say:

*“It was simply explained in a way that made sense. I finally understood why I felt worn down.” — Missouri*

*“It helped us think differently about energy and health.” — Kansas*

Conditions commonly associated with impaired cellular energy: Research has shown that reduced mitochondrial function is commonly seen in a wide range of chronic

conditions, including Alzheimer’s disease, autism spectrum disorders, cancer, chronic fatigue syndrome, diabetes, heart disease, ischemia & stroke, Lyme-related illness, and Parkinson’s disease. These conditions appear different on the surface, yet many share a common early feature: cells are not producing energy efficiently.

A simple way to check

We offer a few options:

**Basic Lab Review — \$79.99**

A clear, plain explanation of your current blood work.

**Lab Review + Nutrient Education — \$179.99**

Includes your report plus guidance on what your body may be lacking and time to ask questions.

**Complete Start-to-Finish — \$549.99**

We help arrange labs, review everything carefully, and sit down with you to walk through it step by step.

If this sounds familiar

You don’t have to keep wondering. You can call (816) 547-0807

Monday–Thursday, 9am–6pm

We’ll take the time to go through it with you, in a way that makes sense.

God bless,  
Rich Prather, D.C.

P.S. I didn’t always see this as clearly as I do now. It took years of paying attention, studying patterns, and listening carefully to people. That’s why I take the time to explain it simply.

P.P.S. If all you want is a second set of eyes on your labs, that’s perfectly fine. Sometimes that alone brings the clarity people have been looking for.

HEALTH/ HOME/CLOTHING

I absolutely love my Bearaby blanket! I feel like I experience a deeper sleep & less awakening. The first night I had to get used to the weight. After 3 nights I wouldn't want to do without it!! I also love the way it looks on my bed...
