Editor's Note:

Zach is turning 11 on Tuesday and Evelyn will be 5 the following week. It seems like it was just yesterday when we got the call to pick up Zach. He was so small and helpless. My but how he has grown. He's almost as tall as I am now. I pray every day that he remains the kind, funny and generous soul that he is now.

Matthew and Zach are returning from Church camp on Friday. Zach is going to get one week off and back to scout camp again. He is learning so much at camp. Matthew and Evie will be going to camp next week-end.

It has been a busy summer so far. Everyone is having fun and learning new skills, what more could you ask for.

If you want better nutrition.... you need to start with better soil

WHAT IS BIOCHAR?

Our Biochar is steam activated carbon that is beneficial for our soils and animals

- Biochar creates a biology in your soil that saves money on fertilizer inputs.
- Biochar has the unique ability for attracting and holding moisture, nutrients, and agrochemicals, even retaining difficult to hold nutrients like nitrogen and phosphorus. Nitrogen and phosphorus tend to run off regular soils, upsetting the ecosystem balance in streams and water ways.
- Biochar creates better bedding for chicken houses, dairy cows, sheep, and horses.
- Mix it to your feed for better animal health, and a good manure.

At Mushroom Maiden Farm, we believe in the same enduring principles that guide our communities: faith, family, stewardship of the land, and honest work done well. In a world that often rushes toward shortcuts, we choose a simpler, more transparent path, growing and crafting our products with care, patience, and integrity.

Our mushrooms are cultivated high in the Appalachian Mountains, where clean air, pure water, and rich forest traditions shape their strength. Every batch is tested by an independent lab to ensure purity and quality. We use 100% fruiting bodies, the part of the mushroom where the most valuable nutrients are found, so you receive only the best of what nature provides.

Our Lion's Mane mushroom capsules are carefully prepared to support clarity and well-being, made without fillers or unnecessary additives. Alongside them, we offer two wholesome varieties of coffee, a smooth and robust dark Arabica bean, roasted for rich flavor and steady comfort and a dark Arabica bean Cinnamon Breakfast Roll coffee. To season your table, choose from four distinct mushroom enhanced salts. We offer a Wild Hickory Cold-Smoked Salt, Himalayan Pink, Sriracha, and Thai Ginger, each crafted to complement honest, home-cooked meals.

As a 100% woman-owned farm, we value humility, hard work, and transparency in every step, from growing to packaging. We are committed to straightforward practices and products you can trust for your home and family.

Simple ingredients. Careful hands. Honest quality. That is the Mushroom Maiden promise.

NATURE'S RITE

Natural Wellness Through Colloidal Silver: A Time-Honored Approach to Family Health

"Our family has used these products for years and we have had great success using them for any accidental wounds in our wood shop. We soak the wound with Digestive & Urinary Support and then apply the wound relief after. We also use the DUS for any flu's or viruses"
Laura Yoder

Your head is pounding, your brow is sweating, and the stabbing discomfort in your gut is the only thing that distracts you from the nausea. You run for the bathroom... you want to run to the hospital, but what can they do for you? It's the middle of the night and you had some bad food. Was it the fruit salad that cousin Mary brought or the macaroni salad that Aunt Anne made? Maybe the turkey wasn't done enough?... Just thinking about it makes it worse. Then... it gets worse. Your kids come rushing into your room holding their bellies. They ate it too. Now what are you going to do?

According to the CDC, millions of people experience digestive distress each year related to something they've eaten. Most of these cases are not linked to major outbreaks and many happen around holiday time when food sits out for too long.

But it's not always just a single meal. Many people deal with ongoing digestive discomfort from time to time, and urinary discomfort is also a common concern, especially for women. These issues can come and go, often without warning, and can disrupt daily life in frustrating ways.

Steven Frank was the founder and innovative herbalist behind Nature's Rite for many years. His formulations have helped thousands achieve more comfortable, healthier lives. Today, Nature's Rite offers over 20 different products and features a whole variety of colloidal silver.

I have been using Nature's Rite products my entire life, for over 30 years. They are the health and wellness practices I was raised on, what I know, and most importantly, what I trust. In my experience, they have proven to be safe, reliable, and well-suited for families.

Nature's Rite products, especially the colloids, are always in my medicine cabinet—on hand and ready.

— Colin Frank

Using antibiotics to rid yourself of a urinary infection often leads to a yeast infection. They can kill off so many good-cultures all over your body that the candida takes over.

The world is not sterile. The concern comes when the numbers of unwanted microbes get so high that your body's natural defenses are overwhelmed. Microbial populations can multiply rapidly under the right conditions.

Don't get lost in the numbers, don't get consumed by worry. There is a way to get those children feeling better and back to sleep in an hour. There is a way to do this safely and without antibiotics or hospital emergency rooms. There is a way to help restore your digestive and urinary tract.

By now you must be screaming, "What is it already!!??" The answer is an **enhanced aqueous colloid of silver.** Years of laboratory research on microorganisms have explored how properly prepared silver colloids interact with a wide range of environmental microbes.

Not just any silver colloid is created the same. Some preparations are too weak (less than 20 parts per million), while others are pushed to extremely high concentrations like 250 or 500 parts per million (ppm) by adding sugars, citrates, or proteins. These variations can significantly change how the silver behaves.

As it turns out, a properly prepared **colloid in the range of 40 to 60** ppm creates a more stable and effective formulation. **This balance is what makes the difference.**

If you want to know
whether they will work for you,
then **you have to try them.**

WHY DOES DISC PAIN KEEP COMING BACK?

Free Recorded Message For People Whose Back Pain, Sciatica, Or Disc Problems Keep Coming Back

Many people feel better for a little while.

Then weeks or months later, the pain comes back. Some are told pills, injections, or surgery may be their next step.

But what many people are never told is why the injured disc may not have had the opportunity to repair.

In this free recorded message, Dr. Jeff explains what may be causing the pain to keep returning — and what many disc sufferers should know before taking the next step.

- ✓ Why back pain and sciatica often come back after short-term relief
- ✓ What may keep an injured disc from having the opportunity to repair
- ✓ Why pills, shots, or adjustments may not address the real disc problem
- ✓ Why some people are told surgery is their only option
- ✓ What to know before agreeing to injections or surgery

ARE YOU DEFICIENT IN FATS?

If you have four or more of the listed questions answered with a yes, you are very likely deficient in essential fats.

- Do you suffer from travel or motion sickness?
- Do you experience fits or convulsions?

All natural occurring enzymes are still intact at 108°F.

There are blood tests available to check your fat status. The bottom line is fats are a necessary part of a healthy body. As well as improving your mental health, the essential fats reduce the risk of cancer, heart disease, allergies, arthritis, eczema, and infections. The brain and nervous system are totally dependent on a family of fats. In the past we have had good success with fish oils for dry skin, dandruff, skin rashes, joint pains, memory loss, depression, etc. In the latter 10 years, our results have gradually decreased. I was already aware it did not pay to buy the cheaper brands. By seriously researching the last couple years, we discovered the processing methods used by the well known, expensive brands. We decided the refining process of fish oils is worse than the refining of white, wheat flour. In the beginning the large trawlers spend weeks at sea harvesting the fish. The catch should ideally be quickly transported to a rendering plant. In less ideal situations, the harvest is stored aboard the ship for long periods, degrading in quality. The collection is now heated or cold pressed to extract the oil. The imagineering thought this product is raw and cold pressed, or gently processed, is a marketing ploy. The refinement process involves four major stages: degumming, neutralizing, bleaching, and deodorization. There are up to six processes using heat. In the deodorization, the oil is heated up to 374°F or higher as live steam passes through it at low pressure. The temperature for molecular distillation can reach 395°F. These heating processes cause a significant loss of vitamins A and D and creates harmful trans fats due to high heat. Since almost all of the natural vitamin A and D are removed most producers add synthetic ingredients to be able to show a higher ratio of A&D, EPA, and DHA on the ingredient list on the label. Once the oil is cooled and antioxidants are added to protect the oil from oxidation. Natural antioxidants like ascorbic acid, isolated vitamin E tocopherols from soy, citric acid from GMO corn and common synthetic antioxidants including BHA, BHT, TBHQ and proplgallate are added. They use up to 18 processes before the oil is bottled. Some producers use synthetic citrus and fruit flavorings derived from proprietary chemicals. Some companies also add alcohol (which causes inflammations) to prolong shelf life, defeating the ant-inflammatory effect of the omega 3 naturally occurring in the oil. What we have discovered in our research was a company established in 2019 promoting an unrefined salmon oil with no artificial ingredients added. The oil is capsuled and liquid bottled within one hour after the fish is killed. The heat is never raised above 108°F in the process. It has all the natural ingredients in the oil the fish had orginally including 28 omegas which have been destroyed in many other brands of fish oil through the refining and processing procedures. It is probably the only salmon oil with the natural golden color after bottling, available. While we were experimenting with these oils two ladies that had been bothered with the cracked finger tips at the corners healed within one weeks time. Both ladies had been using a very popular, expensive brand of fish oil for 3 months prior to our trial. The name of this oil is Kraftig Fischol (powerful fish oil). It does not supply only EPA and DHA like most other fish oils on the market, but has DPA included. DPA is absorbed into the blood stream and red blood cell lipids 22% better than EPA and DHA. DPA helps to rebalance the ratio of omega-3's to omega-6's which lowers inflammation in the body. This fatty oil can aid in long term memory retention, which in turn boosts brain function. Numerous studies have reported that DPA has a high anti-cancer potential, particularly when it comes to reducing tumor growth in breast, colon, and prostate cancer. Due to its highly anti-inflammatory effects taking DPA may reduce pain caused by rheumatoid arthritis. It can improve mental health issues like depression, anxiety, and schizophrenia. DPA can decrease the risk of heart disease, prevent arterial blockage, and strokes by as much as 40%. India has one of the largest vegetarian populations and also one of the highest rates of blindness which is associated with deficiency in omega-3's. Both eye and brain are built out of DHA. According to research studies, fish oil excels in increasing the omega oils in blood compared to plant sources. Research shows that adding EPA and DHA to the diet of pregnant women positively effects the baby's visual and cognitive (brain) development. Omega-3's also benefit pregnancy by preventing pre-term labor, lowering the risk of preeclampsia. Omega-3 deficiency increases the mother's risk of depression, which may worsen postpartum mood disorders with each subsequent pregnancy.

Christian Aid MINISTRIES

A channel enabling the church to minister to physical and spiritual needs around the world

Gnawing hunger IN CUBA

A Cuban father arrives home after a long day of hard work. He counts the coins while his children ask what they will have to eat. His heart breaks as he looks into their pleading eyes.

In another Cuban home, a Christian man feels the stress of his family's gnawing hunger. He knows the strain of caring for his wife as she battles cancer. He knows the agony of needing to decide between a piece of fruit for his ailing wife or the taxi fare to travel home from the hospital.

A woman looks up at her leaking roof. But her leaking roof is the least of her worries. She processes the sorrow of a drinking husband. She thinks about her pantry, which is nearly always empty. Her stomach aches since she hasn't eaten in days. Sadness seems to always lurk at her door.

These are the stories of recent recipients of nutritious canned chicken from CAM's cannery in Ephrata, Pennsylvania, and other food aid made possible through your generous support.

Workers in Cuba share the responses of those who receive desperately needed food.

- **They praise God for His provision.**
- **They weep openly.**
- **Their hands tremble as they clasp the precious gift of food.**
- **A father smiles a vibrant smile—knowing that at least for tomorrow he will have food for his children.**

A CAM staff member who visited Cuba in December wrote: *I must admit, I was and am shocked and troubled by the fact that on the back doorstep of the United States is a country with such need! People vacationing on the beaches of Cuba would be shocked to know that mere miles away children are going to bed with almost nothing to eat, and the struggle for survival is similar to what you might expect in Africa or Haiti.*

In addition to providing canned chicken and other food, we are excited for the opportunity to supply spiritual food for Cuba in the form of much-needed Bibles and Christian family magazines. The dearth of Christian literature is as severe as the dearth of food.
